Notes:

- (1) Add "PIN" for natural gas, "PIL" for propane.
 - (2) Based on standard test procedures prescribed by the United States Department of Energy.
 - (3) Net I=B=R ratings are based on net installed radiation of sufficient quantity for the requirements of the building and nothing needs to be added for normal piping and pick-up. Ratings are based on a piping and pick-up allowance of 115. An additional allowance should be made for unusual piping and pick-up loads.
 - (4) Refer to National Fuel Gas Code, ANSI Z223. 1-latest edition for chimney sizing and vent connector lengths.
- * As an Energy Star Partner, Weil-McLain has determined that the CGi-3 and CGi-4E meet the Energy Star guidelines for energy efficiency. CGi boilers are C.S.A. design certified for installation on combustible flooring. Tested for 50 psi working pressure.
